Our Development Methods

AGILE Method

Based on the client requirement & type of the project we prefer to go with the appropriate project execution methodologies & approach. It helps for development of high-quality IT products that meets or exceeds customer expectations, reaches completion within times & cost estimates.

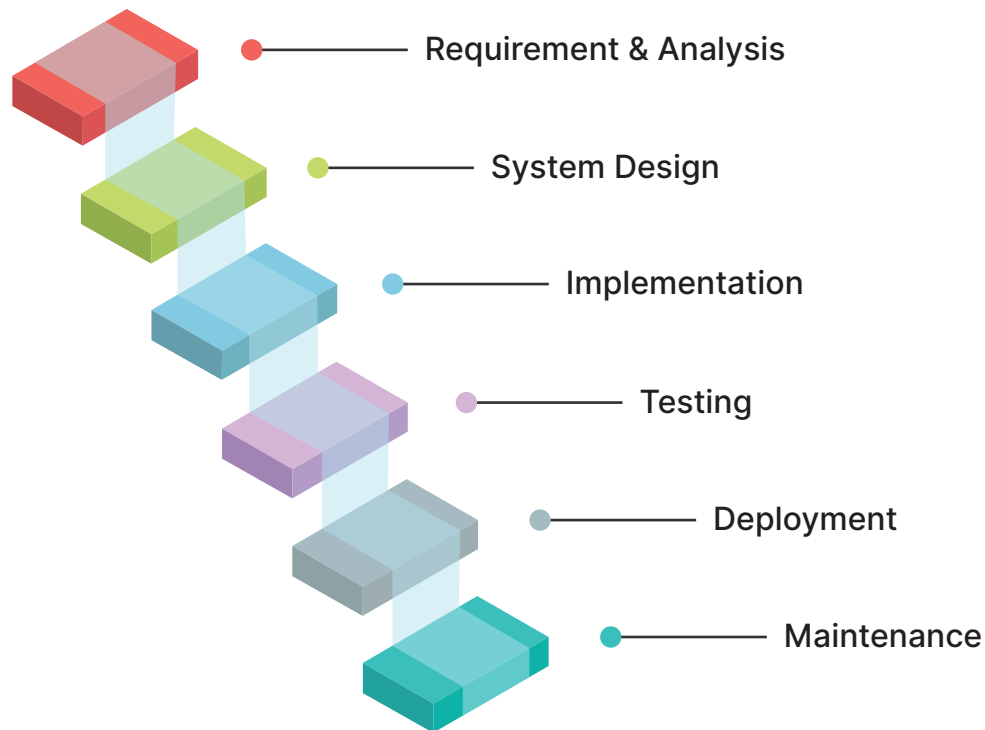

When We use

- ▶ Few Initial Product & Regulatory Requirements
- ▶ Lenient Processes in Place
- ▶ High Product Owner Involvement
- ▶ Innovative product development from scratch
- ▶ Short, Flexible Timeline
- ▶ Budget with Wiggle Room

Our Development Methods

Waterfall Method

The Waterfall methodology is the traditional and the most common methodology used for project management. It follows a sequential, linear process which is why it is often described as a “linear-sequential life cycle model”.

When We use

- ▶ Many Initial Product Requirements & Strict Regulatory Requirements
- ▶ Strict Processes in Place
- ▶ Low Product Owner Involvement
- ▶ Enhancement to an Existing Product
- ▶ Fixed & Firm Timeline
- ▶ Fixed, Inflexible Budget
